# Spiderman

*Spiderman is stunned that you got this far! He tries to use some word problems to confuse you...*

Aunt Mae had 87 apples, she had to put them in bags of 6, how many whole bags could she fill?

Peter Parker had taken 51 photographs and had to share them equally between 4 journalists, how many would he have left?

Hawkeye has 8 quivers and 214 arrows, how many arrows will go in each quiver and how many would be left over?

Tony Stark had 672 bolts to put together 3 Ironman suits. How many bolts can he use for each suit?

Captain America had 54 doughnuts to share between 4 of the Avengers. How many would they get each and how many would be left?
